

Azure Security Engineer Learning Pathway

www.aka.ms/pathways

Getting Started

Azure Security Engineers implement security controls and threat protection, manage identity and access, and protect data, applications, and networks in cloud and hybrid environments as part of an end-to-end infrastructure.

Microsoft Learn

- New to the Cloud or Azure? Start with Azure Fundamentals
- Microsoft Trust Centre
- Compliance
- What is Azure Security Center?
- Azure Monitor – Security & Audit Dashboard
- Introduction to Azure security
- Microsoft Security Blog
- Microsoft Security YouTube Channel

Doing More

- Threat Modeling Security Fundamentals
- Protect identity and access with Azure Active Directory
- Implement Windows Server IaaS VM Identity
- Secure your cloud data
- Architect secure infrastructure in Azure
- Azure security best practices and patterns
- Develop a security and compliance plan
- Best Practices for IaaS Workloads
- Best Practices for PaaS Databases

AZ-500: Microsoft Azure Security Technologies Microsoft Official Practice Test

Search our global events catalogue for upcoming webinars [HERE](#)

Doing More

Managing Azure Active Directory (Azure AD)

- Manage users and groups in Azure Active Directory
- Authentication Options – Decision Tree
- Password Hash Synchronization
- Pass-through Authentication
- Azure Active Directory Consent Framework
- Managed Identities for Azure Resources

Configure Secure Access

- Azure Active Directory Identity Governance documentation
- Delegate access to Privileged Identity Management
- Configure Azure AD role settings in PIM
- Building a Conditional Access policy
- Secure Azure Active Directory users with Multi-Factor Authentication

Network Security

- Network Security Groups
- Create, change, or delete a network security group
- Azure Firewall
- Azure Web Application Firewall
- What is Azure Front Door?
- What is Azure Bastion?

Security for Compute

- Endpoint Protection
- Vulnerability Management
- Configure a TLS/SSL Certificate
- Access and identity options for Azure Kubernetes Service (AKS)
- Authenticate with an Azure container registry

Azure Key Vault

- What is Azure Key Vault?
- Azure Key Vault security overview
- Key rotation
- Quickstart: Create a key vault using the Azure portal

Role Based Certification Microsoft Certified: Azure Administrator Associate

Azure Administrator is a great complimentary certification for Security Engineers. It is recommended but NOT mandatory.

AZ-104: Microsoft Azure Administrator

- Prerequisites for Azure administrators
- Manage identities and governance in Azure
- Implement and manage storage in Azure
- Deploy and manage Azure compute resources
- Configure and manage virtual networks for Azure administrators
- Monitor and back up Azure resources

Role Based Certification Microsoft Certified: Azure Security Engineer Associate

AZ-500 Microsoft Azure Security Technologies

- Manage identity and access
- Implement platform protection
- Manage security operations
- Secure data and applications
- Secure your cloud applications in Azure
- Implement resource management security in Azure
- Implement network security in Azure
- Implement virtual machine host security in Azure
- Manage identity and access in Azure Active Directory
- Manage security operations in Azure

Unified Support (subject to customer contract)

- To be added by your Customer Success Account Manager.
- New to Unified Support? Explore it [here](#)

Azure Security

Microsoft Docs

- Fundamentals
- Azure security technical capabilities
- Security Controls for Azure Services
- For Developers
- Benchmarks and recommendations
- Secrets and keys
- Data protection
- Identity management
- Security monitoring
- IoT security monitoring
- Governance & Compliance
- Threat Protection
- Logging and Auditing
- Management & Monitoring Overview
- Network Security Overview
- Security Best Practices
- DDoS Protection
- Infrastructure Security
- VM Security
- Data Security
- Azure Security Expert Series
- How to organize your security team: The evolution of cybersecurity roles and responsibilities

Monitoring & Policies

- Security Center
- Monitor Security Status
- Centralised Policy Management
- Managing Security Policies
- Vulnerability Scanner
- Exercise - enable JIT VM access
- What is Azure Policy?
- Tutorial: Create and manage policies to enforce compliance
- Tutorial: Create a custom policy definition
- Define standard resources with Azure Blueprints
- Quickstart: Define and assign a blueprint in the portal
- Azure Monitor
- Alerts
- Create, view, and manage log alerts using Azure Monitor
- Configuring Diagnostic logging and log retention

Azure Sentinel

www.aka.ms/pathways

Getting Started

Microsoft:

- [What is Azure Sentinel?](#)
- [Microsoft Security YouTube Channel](#)
- [Azure Sentinel Blog](#)

Microsoft Docs & Reference

Learn More:

- [Azure Sentinel documentation](#)
- [Azure Sentinel and Microsoft Teams](#)
- [Manage Azure Sentinel workspaces at scale](#)
- [Cyber threat intelligence with Azure Sentinel](#)
- [Useful resources for working with Azure Sentinel](#)
- [Become an Azure Sentinel Ninja \(from Sentinel Blog\)](#)
- [Azure Sentinel integration with Microsoft Cloud App Security](#)
- [Build a scalable security practice with Azure Lighthouse and Azure Sentinel](#)

Search our global events catalogue for upcoming and on-demand Sentinel webinars [HERE](#)

Blog Updates

Selected recent updates from the [Azure Sentinel Blog](#)

1. [Protecting your DocuSign Agreements with Azure Sentinel](#)
2. [Bring Threat Intelligence from IntSights Using TAXII Data Connector](#)
3. [What's new: Dedicated clusters for Azure Sentinel](#)
4. [Managed Identity for Azure Sentinel Logic Apps connector](#)
5. [Handling ingestion delay in Azure Sentinel scheduled alert rules](#)
6. [Improved Analytics Preview Graph in Public Preview !](#)

Cloud-native Security Operations with Azure Sentinel

This learning path covers basic architecture, core capabilities, and primary use cases of its products. You'll also learn about differences and get familiar with Azure Sentinel, a cloud-native, security information and event management (SIEM) service.

Microsoft Learn:

- [Introduction to Azure Sentinel](#)
- [Deploy Azure Sentinel and connect data sources](#)
- [Threat detection with Azure Sentinel analytics](#)
- [Security incident management in Azure Sentinel](#)
- [Threat hunting with Azure Sentinel](#)
- [Threat response with Azure Sentinel playbooks](#)
- [Query, visualize, and monitor data in Azure Sentinel](#)

Azure Sentinel Level 400 Ninja Training

The [Azure Sentinel Level 400 Ninja Training Blog Post](#) has been designed to help you become an Azure Sentinel master. We've categorised the modules within the posting by job role to ensure the most appropriate learning path for you. Check out the [Ninja FAQ](#) before starting

Sentinel Ninja

Everything you need to know and perhaps a little more....

- [Module 1: Getting Started with Sentinel](#)
- [Module 2: How is Azure Sentinel used?](#)
- [Module 3: Workspace and tenant architecture](#)
- [Module 4: Data collection](#)
- [Module 5: Log Management](#)
- [Module 6: Enrichment: TI, Watchlists and more](#)
- [Module 7: Kusto Query Language \(KQL\)](#)
- [Module 8: Analytics](#)
- [Module 9: Implementing SOAR](#)
- [Module 10: Workbooks, reporting & visualization](#)
- [Module 11: Use cases and solutions](#)
- [Module 12: Handling incidents](#)
- [Module 13: Hunting](#)
- [Module 14: User and Entity Behaviour Analytics](#)
- [Module 15: Monitoring Azure Sentinel's health](#)
- [Module 16: Extending and Integrating using Azure Sentinel APIs](#)
- [Module 17: Bring your own ML](#)

SOC Manager

Managing a team of Engineers and Analysts within the SOC

- [Module 1: Getting Started with Sentinel](#)
- [Module 2: How is Azure Sentinel used?](#)
- [Module 3: Workspace and tenant architecture](#)
- [Module 4: Data collection](#)
- [Module 5: Log Management](#)
- [Module 11: Use cases and solutions](#)
- [Module 12: Handling incidents](#)
- [Module 13: Hunting](#)
- [Module 14: User and Entity Behaviour Analytics \(UEBA\)](#)
- [Module 15: Monitoring Azure Sentinel's health](#)

SOC Analyst

Advanced use of Azure Sentinel including creating and managing automation and threat intelligence

- [Module 1: Getting Started with Sentinel](#)
- [Module 10: Workbooks, reporting, and visualization](#)
- [Module 11: Use cases and solutions](#)
- [Module 12: Handling incidents](#)
- [Module 13: Hunting](#)
- [Module 14: User and Entity Behaviour Analytics \(UEBA\)](#)

SOC Engineer

Basic use of Azure Sentinel including dealing with incidents and using dashboards

- [Module 1: Getting Started with Sentinel](#)
- [Module 2: How is Azure Sentinel used?](#)
- [Module 3: Workspace and tenant architecture](#)
- [Module 4: Data collection](#)
- [Module 5: Log Management](#)
- [Module 6: Enrichment: TI, Watchlists, and more](#)
- [Module 7: Kusto Query Language \(KQL\)](#)
- [Module 8: Analytics](#)
- [Module 9: Implementing SOAR](#)
- [Module 10: Workbooks, reporting, and visualization](#)
- [Module 15: Monitoring Azure Sentinel's health](#)
- [Module 16: Extending and Integrating using Azure Sentinel APIs](#)

Doing More

- [Join Private Preview Program](#)
- [Keep track of what's new](#)
- [Ask, or answer others on the Azure Sentinel Tech Community](#)
- [Submit feature requests using user voice](#)
- [Contribute or enhance rules, queries, workbooks, connectors and more to the community on the Azure Sentinel GitHub](#)

Not Sentinel but looking to broaden your knowledge of Azure Security? Then consider.....

Role Based Certification Microsoft Certified: Azure Security Engineer

AZ-500 Microsoft Azure Security Technologies

- [Manage identity and access](#)
- [Implement platform protection](#)
- [Manage security operations](#)
- [Secure data and applications](#)
- [Secure your cloud applications in Azure](#)
- [Implement resource management security in Azure](#)
- [Implement network security in Azure](#)
- [Implement virtual machine host security in Azure](#)
- [Manage identity and access in Azure Active Directory](#)

Identity and Access Management & Compliance – self guided learning

www.aka.ms/pathways

Identity & Access Management

Fundamentals

Overview

- Fundamentals of Microsoft 365 Security + Compliance ■
- Intro to Security in Microsoft 365 ■
- Manage Security with Microsoft 365 ■
- Microsoft 365 Identity and Services

Zero Trust

- Principals and Overview

Azure Active Directory (AAD)

- Manage Identity and Access in Azure AD ■
- Azure AD Authentication Fundamentals ▶
- Finding the Right Identity Strategy for Your Organization with Azure AD ▶

Microsoft Endpoint Manager

- Microsoft Endpoint Manager Fundamentals ■

Intermediate

Azure Active Directory

- Identity and Access Management Deep Dive
- Protection Identity and Access ■
- Manage Identities and Governance ■
- Enable a Combined MFA and SSPR Registration Experience in Azure AD ●
- Configuration and Management ▶
- Manage and Integrate Apps Securely ▶
- Secure Remote Work ▶
- Enable Integrated Windows Authentication to On-Premises Applications with Azure AD Application Proxy ●
- Configure Conditional Access in Azure AD ●
- Manage Guest User Access in Azure AD for B2B Collaboration ●
- Integrate SaaS Applications with Azure AD ●

Microsoft Endpoint Manager

- Microsoft 365 Mobility and Security
- Manage Devices ■
- Manage Apps ■

Zero Trust

- Deployment Center

Advanced

Azure Active Directory (AAD)

- App Proxy—Integrated Windows Authentication ●
- Azure AD Secure Hybrid Access with F5 ●
- Enable B2B Collaboration in Azure AD ●
- Migrate to Cloud Authentication Using Staged Rollout in Azure AD ●
- Enable Header-Based Authentication to On-Premises Applications with Azure AD Application Proxy ●

Microsoft Endpoint Manager

- Manage Devices with Microsoft Endpoint Manager ●
- Manage Apps with Microsoft Endpoint Manager ●

Compliance

Microsoft 365 Compliance

- Be a Risk Management Hero
- Supercharge Information Protection and Governance
- Don't Lose Sleep Over Insider Risks
- Simplify and Extend Compliance Beyond Microsoft 365

Safeguard Customer Data

- Learn How Microsoft Safeguards Customer Data ■

Information Protection & Governance

- Information Protection and Governance ▶
- Protect Sensitive Data with Microsoft Information Protection ●
- Information Protection & Governance ■

Insider Risk Management

- Manage Internal Risk in Microsoft 365 ■
- Minimize Internal Risks ●
- Insider Risk Management ▶
- Minimize Communication Risks ●
- Implement Privileged Access Management ●

Discover & Respond

- Advanced eDiscovery and Advanced Audit ■
- Discover & Respond ▶

Compliance Management

- Reduce Risk with Microsoft Compliance Manager ■
- Simplify Compliance and Reduce Risks ▶

Compliance Ecosystem

- Security and Compliance
